# COMMAND THE COURT

The Wave Technology provides unbeatable control and stabilisation in short bursts of speed. The wide outsole in combinationwith the exceptional shock absorption from the midsole supports you during lateral movements. The upper is engineered with smart layers of mesh and synthetic materials for an increased comfort, flexibility and stability.

- The Mizuno Wave Technology provides extra cushioning in the rearfoot and keeps the ankle in the right position.
  Increased outsole width for enhanced slide control and lateral stability.
- The dual density Ap+ midsole provides stability on the lateral side and powerful cushioning and shock-
- absorption in the centre and rearfoot.
- Flexible and lightweight upper constructed with more mesh for a greater comfort.

### WAVE TECHNOLOGY

### Parallel Wave

Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.

### Fan-shaped Wave

Wave technology which features various Wave heights, delivering excellent cushioning and stability.

### Infinity Wave

Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.

### Double Fan-shaped Wave

Wave technology that gives the highest levels of support combined with excellent cushioning.

## ALL SPORTS

Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape absorbs and disperses the impact at foot strike, which results in a smoother, more cushioned feel on every step.

ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.

The DynamationFit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.

Breathable and cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.

Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.

### Removable INSOCK

Removable insock for comfort and cushioning.

SR touch

An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.

Premium INSOCK A high-grade removable insock for comfort and cushioning.

MIZUNOCOB

MIZUNO COB (center of balance) is a midsole structure with multiple pods that activate body awareness to increase balance.

Provides a well cushioned landing with amazing energy return. This midsole material surpasses all expectations of comfort set by previous materials.

Redefine what Energy return should feel like with this super soft and bouncy midsole material created by Mizuno for our top line products.

# RUNNING TECHNOLOGIES

AeroHug	The new MIZUNO upper technology holds the foot stable during the run for a secure fit and an unrivalled comfort. A soft fabric mesh stretches and wraps around the foot to create the most comfortable ride.	PEBAX' POWERED	Pebax® Powered Wave Plate for lightweight energy return
<b>X</b> 10	Durability and Traction. X-10 is an extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and gives more traction at the heel strike.	pebax	The Wave Plate is constructed with a bio-sourced Pebax Rnew® plate. This provides extremely lightweight support and energy return, empowering athletes with every step.
XtaRide	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leads to trail shoes that adapt to their surroundings and work in perfect harmony with the body.	Qaic X	An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. It gives an energised, euphoric and supercomfortable run.
F-A	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.	ESS Rock Plate	An extra solid sheet rock-plate in the forefoot which provides superb protection against stones and rock.
Vaic	A unique midsole compound providing high comfort and perfomance, while being extremely lighweight.	GORETEX	Waterproof, breathable fabric membrane upper technology.
SOLES MICHELIN	An original rubber compound developed by Michelin that provides more grip and comfort.	Blown Rubber	The pressure absorbing blown rubber outsole optimizes pressure distribution throughout the forefoot.
5moothRide	An engineered approach to minimise the rapid acceleration and decelaration of the foot during transition, creating the smoothest ride possible.	XPJP	A completely new type of midsole compound that delivers cushioning, rebound and durability at a high level. The exquisite harmony of the super soft and advanced cushioning with high energy return makes you feel as if you are floating on water.
WAVEKNIT	A knit construction inspired by our Mizuno Wave technology. It's dynamic stretch and hold abilities provides a sock-like fit that feels natural every step.	<u>Xta.Gri</u> p	A outsole construction that provides superior grip on various surfaces thanks to it's adaptive abilities. Allows for high traction on soft surfaces and high friction on firm surfaces.
ELB	A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.		

# FOOTBALL & RUGBY TECHNOLOGIES

D-Flex Groove	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.	(ZEROGLIDE)	Grippy insock material that stops the foot from sliding inside the shoe.
PRIMESKIN	Upper delivers a high level of softness and durability with a structured fit.	<b>■</b> -FIBER CONTROL	R-Fiber mesh controls the upper stretch and securely holds the foot during acceleration and turns.
Vaic	A unique midsole compound providing superb comfort and perfomance, while being extremely lighweight.	Mizina	Highest kangaroo leather quality for premium comfort fit and natural ball touch.
CVFRAME	It is a revolutionary concept, with an integrated memory foam construction which controls three key performance characteristics: Fit, Stability and Touch.		

# RACKET SPORTS TECHNOLOGIES

59 <b>-</b> 20 <b>1</b> 19	A unique upper providing the highest level of softness and durability, while maintaining breathability.	D-Flex Groove	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
Powne	An exceedingly lighweight midsole material with excellent comfort and resilience properties.	<b>X</b> 10	Durability and Traction. X10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.
Dynamotion Groove	Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.	BOA	The BOA Fit System contains three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. It is engineered to optimize fit and provide precision, adaptability, and control.

# INDOOR TECHNOLOGIES

D-Flex Groove	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.	Pown@	An exceedingly lightweight midsole material with excellent comfort and resilience properties.
X5 RUBBER	A performance outsole component that enhances traction where needed most.	Dynamotion Groove	Specifically designed flex grooves in the outsole to improve stability and on court agility.
OURA SHIELD	Dura Shield protects your toes and increases the product durability.	—KURA LINER—	Super soft and durable synthetic collar lining insert which adds comfort and durability when using ankle braces.
VS-I	A shock-absorbing cushioning compound.		

# APPAREL TECHNOLOGIES

(MIZUNO DRYLITE®)	Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best perfomance.	(MIZUNO FRESHPLUS*)	Mizuno FreshPlus technology adds an anti- bacterial and deodorising function to your garment, creating a fresher and odour reducing product.
Mizuno Booymapping	Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.	DynamotionFit	Mizuno DynamotionFit technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.
FENCIMANCE ENANCING TECHNOLOGY	Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.	(MIZUNO COOLTOUCH)	CoolTouch technology provides a soft feeling and leads to extremely quick drying.
(MIZUNO IMPERMALITE <sup>®</sup> )	Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.	(BUNDSTITCH)	BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.
NIGHTLITE	NightLite, with its reflective material, provides superior retro reflection for low light running.	BREATH THERMO	Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.
(MIZUNO WARMALITE®)	Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.	\$ SOLAR OUT	SolarCut technology reflects sunlight ultraviolet waves by reducing the light transmission and thus keeping the body cool.
drydy⊜	Saving water with pure performance. Waterless dyeing process, without added chemicals, that saves up to 25 liters of fresh water per tee shirt dyed.	DRY FIGROFLOW	Keeps high breathability in case of sweaty. Dry material with high heat release. Keeps high breathability in case of sweaty. Dry material with high heat release.
